Table 2: Digital Platforms Regulator Forum (DP-REG) Updates

Digital Platforms Regulator Forum (DP-REG) Updates		
DP-REG	Workstreams	Status Update
<p>Digital Technology Working Group</p>	<ul style="list-style-type: none"> Examining algorithms and their impact Horizon scanning and examination of technologies (pilot) 	<p><u>Examining algorithms and their impact</u></p> <ul style="list-style-type: none"> The Working Group is in the process of finalising its algorithms literature review. Through this review, DP-REG aims to establish a joint point in time understanding of the harms and risks posed by some commonly-used types of algorithms. It focuses on three topics relevant to intersecting priorities of DP-REG members: algorithms used in content moderation, recommender systems and targeted advertising. It is intended to develop our common understanding of these areas and may inform future work of DP-REG or individual members on these topics. The Group will bring a paper to the Steering Committee meeting scheduled for 2 June 2023 for a decision on whether to pursue publication of this report. We welcome Board member views about whether this should be made public. <p>Horizon scanning; pilot technology examination – Large Language Models (LLMs)</p>

Digital Platforms Regulator Forum (DP-REG) Updates		
DP-REG	Workstreams	Status Update
		<ul style="list-style-type: none">• The Working Group is producing an analysis paper focused on Large Language Models. This is intended to be a 'pilot' for a number of similar papers each focusing on particular digital technologies and their relevance to the work of each DP-REG member.• As part of this work, we held a workshop on 27 March 2023, which included participation by the ACCC's Strategic Data Analysis Unit. We have also been liaising with DISR and relevant academics from RMIT and Macquarie University.• The Group is aiming to present this pilot to the DP-REG Steering Committee at its meeting of 2 June 2023.
