Subject: [REDACTED] MA1000021 – Telstra TPG Spectrum Transaction – submission

As a current Vodafone customer with offices across Australia and remote and regional travel being a key requirement for many of our staff, the proposed TPG and Telstra network sharing agreement would be a welcome step forward in my view. The proposal will provide improved network coverage for Vodafone customers travelling through regional and rural Australia and will also introduce real choice and carrier competition for customers living outside the larger city centres.

I support the proposal for TPG and Telstra to share network infrastructure.

Dylan James
