Subject: YESBIZ WIRELESS PTY LTD: MA1000021 – Telstra TPG Spectrum Transaction – submission'

Hi,

As a direct contact to consumer we feel that agreement with Telstra and TPG will have significant benefits in terms of better quality of services, greater regional coverage and improved data speeds.

It's a great win for TPG and related MVNO customers to access 3700 of Telstra Mobile towers, resulting in much better 4G and 5G coverage for both Telstra and TPG telecom customers.

It's a great win-win from consumer perspective resulting in improved connectivity. Regional and rural customers will be accessing improved data speeds on their mobile devices on a significant expansion, allowing TPG providing contiguous voice and data over a much greater area. This agreement will lead TPG network accessing to 98.8 percent of Australian population. Both TPG and Telstra customers are the real winners leading a healthy competition in regional areas. There looks to be no financial burden on both companies and 98.9 percent of population accessing improved network.

As a developed country like Australia providing high quality mobile network is need of the day and this agreement will have a significant contribution. Hopefully this agreement will go ahead to help us give our customers better quality of services.

Many Thanks,

Sameer Rana
