To Whom it may concern

I am writing this letter to put our point and views across on the unfair extremely high pricing of Peel River Valley Water pricing on farmers and irrigators and surrounding districts

I believe it should be one price across the state of NSW which would be more fair to everybody.

The extremely high prices is and will currently affect and hurt <sup>us in</sup> so many people ourselves as well as farmers, business communities, tourism and families of all ages and irrigators and the growth of Tamworth and surrounding area and most of all families and farmers of our future of Australia and our next generation of farmers and the current ones.

Small businesses are laying off employees and some have closed some farmers are walking off their farms and livelihood. I believe we may or will have to do the same in the next year or two

The unfair and extremely high pricing of water is putting so many <sup>pressures</sup> health issues on us as well more stress anxiety well being on families, farmers, business communities of Tamworth & surrounding districts

Yours faithfully  
Dianne & Phillip Rumbel
