OFFICIAL

Hi [REDACTED]

Thank you both again for meeting with us today. As discussed, we have prepared a second version of the draft FOAS and FTAS service descriptions (**attached**).

We are interested in your views on this alternative wording and would be grateful if you could provide any further comments before the end of the day.

Kind regards,

[Redacted]

OFFICIAL

Hi [Redacted],

Many thanks for your engagement on the fixed voice interconnection service descriptions.

We received responses from a number of stakeholders, including alternative drafting to incorporate Session Initiation Protocol into the service descriptions. We would like to discuss an alternative approach with you to see if it would address your concerns. Essentially the proposed drafting would make the service descriptions technology neutral, with the exception of pre-selection and over-ride/access codes which we understand are only provided over the PSTN.

Are either of you available today for a quick call to discuss?

Good afternoon,

Symbio welcomes the ACCC proposal to vary the service descriptions in the FOAS and FTAS to include a reference to Session Initiation Protocol (SIP) Interconnection so that it is clear this is captured by the service descriptions.

Please find attached our public response, except contact details as noted.

Have a lovely weekend all, enjoy the long weekend those in Victoria.

Thank you,

[REDACTED]
