

DUST EXTRACTION & VACUUMS

Regularly **breathing construction dust** can cause **life-changing lung diseases** like Lung Cancer, asthma, Chronic Obstructive Pulmonary Disease (COPD)

Types of Construction Dust

- Silica dust from concrete, mortar and sandstone
- Wood dust from softwood, hardwood and wood-based products like MDF and plywood
- Lower toxicity dusts from plasterboard, limestone, marble and dolomite

Common Construction Tasks Creating Dust

- Cutting paving blocks, kerbs and flags
- Chasing concrete and raking mortar
- Cutting roofing tiles
- Scrabbling or grinding
- Soft strip demolition
- Dry sweeping
- Cutting and sanding wood
- Sanding taped and covered plasterboard joints

Saves time and money – packing away is quicker, allows getting home or moving on to the next job quicker

Better health & wellbeing – reduced risk of serious lung diseases

Reduced working days lost due to workplace illness

Used appropriately to meet legal requirements / no HSE fines for inefficient, wrong or no dust extraction

THREE CLASSES

- **L Class $\leq 1.0\%$ Dusts with maximum allowable concentrations (MAC) $> 1 \text{ mg/m}^3$**

Soft woods and solid surface material (e.g. Corian)

Filters 99% of all air

$<1\%$ of extracted dust passes out of the filter

- **M Class $< 0.1\%$ Dusts with maximum allowable concentrations (MAC) $\geq 0.1 \text{ mg/m}^3$**

For hard woods, board materials, concrete and brick dust

Filters 99.9%

$<0.1\%$ of extracted dust is passed out of the filter

- **H Class $< 0.005\%$ Dusts with maximum allowable concentrations (MAC) $< 0.1 \text{ mg/m}^3$**

Highly carcinogenic dusts, asbestos, formaldehyde, mould, germs and bacteria

Filters 99.995%

Releases $<0.005\%$ of dust back into the air

HEPA

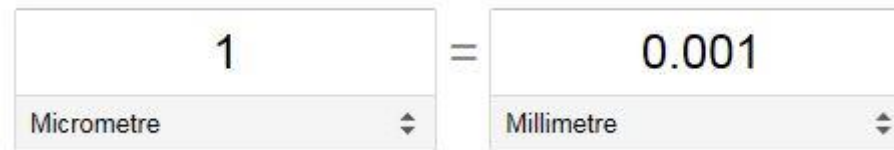

Many people often mistake this for believing it to be a brand or manufacturer, and this is not true. It is important to note that HEPA is a type of air filter.

HEPA was commercialized in the 1950s, and the original term became a registered trademark and later a generic term for highly efficient filters.

HEPA stands for “High Efficiency Particulate Arresting”

HEPA

To qualify as a “True HEPA” an air filter must remove (from the air that passes through) 99.97% of particles that have a size of 0.3 microns in diameter.

A diagram illustrating the conversion between micrometres and millimetres. It consists of two input fields separated by an equals sign. The left field contains the number '1' and a dropdown menu with 'Micrometre' selected. The right field contains the number '0.001' and a dropdown menu with 'Millimetre' selected.

$$1 \text{ Micrometre} = 0.001 \text{ Millimetre}$$

Products that claim to be "HEPA-type", "HEPA-like", "HEPA-style" or "99% HEPA" do not satisfy these requirements and may not have been tested in independent laboratories

HEPA	
Filter Class	Efficiency (%)
E 10	≥ 85
E 11	≥ 95
E 12	≥ 99,5
H 13	≥ 99,95
H 14	≥ 99,995
U 15	≥ 99,999 5
U 16	≥ 99,999 95
U 17	≥ 99,999 995

- HEPA = **H**igh **E**fficiency **P**articulate **A**bsorber
- A generic term to describe a high efficiency filter
- Consists of a mat of randomly arranged fibreglass layers
- European Standard = EN 1822-1:2009
- The filter must remove 99.95% of particles that have a size greater than or equal to 0.3 microns (µm)

In 2007, DEWALT created the most comprehensive system in the world for tools dedicated to safety

Products that meet strict criteria in one or more of core safety-focused areas:

CONTROL

VIBRATION

DUST

Guarantees the potential of inhaling dust is dramatically reduced to give a cleaner and safer working environment

Users

Any trade requiring dust management solutions

- Construction site workers
- Plumbers
- Electricians
- General builders
- General contractors
- Flooring contractors
- Dryliners
- Onsite contractors

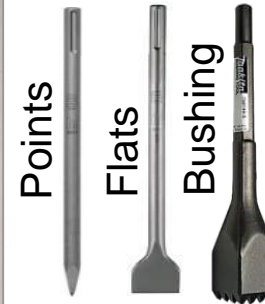

Many more...

Applications

Chipping / Demolition

Drilling

Legislation Compliance

- Reduces airborne dust
- Encouraged on site
- DEWALT leading dust reduction

Health & Safety

- Reduces site 'dust prevention' costs
- Combats Silicosis & other dust related diseases

Compatibility

- All DEWALT 5, 6, 7, 9, 10, 12, 16 & 30 Kg's
- Innovative extractor connectivity

Drilling & Chipping Solution

- Total large hammer solution
- All common applications covered
- Accepts most drill bits and chisels

DWH201D

Replaces D25301D

Sleeve Fits DEWALT SDS-Plus Hammers (18V, 54V & Coded) Plus Premium Drills

For system compatibility
Versatility

Side Handle And Depth Rod
(Same As D25301D)

Enhances control
Ease of use and stability

250mm Or 160mm Sleeves
For use with long bits or short bits for various applications
Versatility

	Result
Max. Drill Bit Diameter	25mm
Max. Drill Bit Length	250mm
Max. Drilling Depth	129mm
Max. Chisel Diameter	25mm
Hose Length	1000mm
Hose Diameter	30mm

Use With Airlock Hose Or Without Using Plug
Connects to DEWALT Extractors for system compatibility or use as a standalone collector
Versatility

160MM, 250MM SLEEVES & 150MM HOSE INCLUDED

DWH201D-XJ

- Collects dust and debris during drilling. Can be used with a dust extractor for complete dust collection, or alone as a collector
- Quick-fit system for easy tool free assembly and release
- For use with DEWALT corded and cordless SDS-Plus hammers
- Ideal for dust free drilling up to 25mm diameter
- Tough and versatile to meet the needs of the most demanding applications with a compact design to maintain visibility and extremely light weight to minimise user fatigue
- 1000mm heavy duty rubber hose for maximum reach
- Side handle adaptor for increased compatibility and depth rod for ease of use
- Includes side handle with dust extraction adaption, rubber hose, 250mm long and 160mm short accordion collectors. Packaged in a cardboard branded box

Welcome to the Stanley Black and Decker e-Learning Centre!

Whether it's residential construction, commercial construction, repair or renovation, we've got you covered. We've been here for you since 1843. And since we know you count on us to deliver the best, we push ourselves every day to deliver the toughest, strongest, most innovative power tools, hand tools and fasteners on the market. It is our goal not only to provide you with the best products, but also to provide you with the training and support you may need in order to understand the features, benefits and the range of applications our products can be used for.

All the courses are delivered through our high quality Learning Management System, allowing you to study online at your own pace, from anywhere with an internet connection.
