

Hi – I just wanted to share my thoughts to this enquiry –

It worries me that Facebook dominates social media like it does.

Basically, I think it wants to be “The entire Internet” – and to many people (especially young people with smartphones) this is their ONLY method of interacting with the internet.

For example, it offers instant messaging, audio and video calls, sending/receiving of images, text messages, buying and selling goods and services, uploading videos and watching videos (now more videos are watched on Facebook than Youtube!) , just about every traditional online media is now available via Facebook.

Not sure what the answer is, but I would like to see more competition to companies like Facebook.

Kind regards,

David Nebe
