### Interim report submission form

#### Contact information

**Name/organisation:**

Darren Kennedy

**Address/region:**

[REDACTED]

**Email:**

[REDACTED]

**Do you use Murray-Darling Basin water markets for trading water rights or water market products?**

No

**Which trading zone(s) do you own or trade water in?**

**If you selected other, please provide further details::**

N/A

**Which of these options best describes your role or interest in the water market?**

**Role in water market:**

Other

**If you selected other, please provide further details::**

I am a concerned citizen who does not believe that water should be traded as a commodity and especially with no transparency as to the holders of water licenses.

Water is our most basic resource and should be available first and foremost to citizens free of charge and to Farmers who are responsible for our second most important resource food.

Companies who have no actual landholding and who do not produce food or use it for mining or other industrial uses should be able to have a water license and should especially not be able to trade it for profit.
