ACCC

Investigation into water theft ,corruption and nepotism in the Murray Darling Basin.

The Investigators/To Whom It May Concern...

Have you watched Linton Besser's 4 Corners program?

Have you examined the networks that appear to exist between major water licence thieves owners and politicians and senior bureaucrats?

Did you listen to any of the interviews with Kate McBride or read credible scientific reviews?
eg <https://www.science.org.au/supporting-science/science-policy-and-sector-analysis/reports-and-publications/fish-kills-report>

What difference is your report going to make to people who are only interested in greed and short term opportunism?

The state of environment and public education are matters of critical national importance.

Yet both are routinely trashed, predominantly by neo-liberal politicians and Murdoch empire etc.

It's been going on so long that most people now longer care, are jaded or tone deaf on these issues.

What's needed...? umm how about we start with truth in media legislation and a federal ICAC with some balls. Transparency, accountability and decency.

And listen to some Neil Murray while you're out there ... Cry My Darling.

regards

Adrian Tourle
