Subject: CEC Code - AA1000514 – Submission

Hi,

I wish to make this formal submission.

My name is [REDACTED] and I have worked in the industry since 2014. I have an amazing professional business that took 2 years of planning and investment.

I agree that the ACCC is correct that the code is a breach and violation of my rights to trade as a retailer & customers rights.

There is a blanket restriction stopping any company that has not traded 12 months and they will not take in to account the true experience or position of the directors. Even though I have more experience / run a more professional businesses than many with the retail accreditation / have a better financial position – I AM ILLEGALLY BLOCKED. This impacts trade / competition / many customers getting our solution which is more credible than others.

I am a member of both organisations and do only ever use SIGNIFACANTLY EXPERIENCED INSTALLERS – by the way which are some of the best and longest CEC qualified installers (some CEC installers do not meet the standard) or Smart Energy Council - Master Installers. In other words I get it right! and am blocked and many in the industry are hopeless. I have estimated my team have collectively sold / installed over 6,000,000kw over many years in the industry – but again not recognised by the CEC.

Then there is the criteria of grants / state and federal plus preference treatment by being added to programs before others for some and / or only retailers listed with CEC. What a joke. What a cartel – please – how did this even happen.

TAKE OUT THE BLOCKAGES for proper professional businesses AND MAKE SURE THERE IS PROPER VETTING OF MEMBERS BUT MORE IMPORTANTLY THOSE OUT THERE THAT AREN'T AND DODGY.

Warm Regards
